XP 30 CLEAR BASE - WB

TECHNICAL DATA SHEET

PERTIES

PROPERTIES

It is a water based printing base used to obtain vivid colors with elastic and soft touching effect.

It can be printed white and light colored cotton and cotton-polyester blend fabrics.

Does not dry during the print and block the screen.

If cured correctly as advised, the dry-wet rubbing and washing fastness are high.

Rubbing and washing tests should be applied 24 hours after curing.

Suitable to ecological standards.

Appearance Transparent paste 4,5-6 (25 °C/77 °F) Hq $1,00 \text{ g/cm}^3 (25 \,^{\circ}\text{C}/77 \,^{\circ}\text{F})$ Density

[(25 °C) sp: 7, rpm: 20 Brookfield]: 70.000 – 80.000 [mPa.s] Viscosity

In order to have more covering, elasticity, color productivity in white and light colored Printing:

fabrics double print is advised with flash cure.

To print on dark colored cotton fabrics, SP 240 - Snow White - WB, GS 603 Fine Mesh Clear

White - WB or XP 50 White - WB should be used as underbase.

To print on polyester fabrics which may cause dye migration, SP 230 Anti Migration - WB

should be printed as underbase.

Screen Silk screens that are made of 43 cm/110 inch mesh 70 micron silk - 62 cm/157 inch mesh

55 micron silk.

57 – 62 Shore U type squeegee should be used. Squeegee

Mixture In need of improving elasticity of XP 50 White-WB, XP 30 Clear Base-WB can be added.

To color XP 30 Clear Base - WB, OP Series (1-5%) or FR Series (5-15%) pigments can be

added.

To reduce the viscosity SP 209 Regulator - WB (1-3%) can be used.

Never use water to reduce the viscosity. Before use, please stir the ink well. Do not use any

additives that are not advised.

After using, the screen should be cleaned with the water.

Should be cured at 160 °C/320°F for 1,5 minutes.

Curing

It does not contain harmful substances for inhalation and skin when used. However in case of contact to sensitive organs, such as eyes or mouth wash with plenty of water. If necessary, medical assistance is advised. Keep containers dry and tightly closed. Store in a ventilated place between (+5)-(+30) °C/(+41)-(+86)°F of temperature.

It should be consumed within 12 months after the production date.

In 8 kg, 30 kg and 60 kg or 1 gal, 5 gal and 15 gal of plastic packings.
